Lake Musconetcong Community Association, Inc.
Weed Management Program 2017

The Lake Musconetcong Community Association has renewed our contract with Aquatic Technologies of Branchville, NJ. Aquatic will once again provide season long, biweekly monitoring and treatment of lake weeds in public waters fronting residences. Treatments will run throughout the season as warranted.

We are optimistic that this program will again be effective in greatly improving the condition of our beautiful lake.

As in the past, this program relies on the financial participation of our residents.
THERE ARE NO GOVERNMENT FUNDS AVAILABLE FOR TREATMENT IN THESE AREAS.
Therefore, we strongly urge all lakefront owners to contribute an amount proportionate to the length of their properties. The LMCA suggests donations of at least $125 for every 50 feet of linear shoreline.

Everyone enjoying any view of the lake from their homes or while boating, fishing, jogging, or walking along our lake is also asked to contribute. Any donation, however small, would be greatly appreciated to help achieve our goal of treating all areas in our permitted range.

Contributions will be restricted to our weed management fund.

The LMCA is a 501(c)(3) New Jersey non-profit organization. Contributions to the LMCA are tax deductible.

Thank you for your support of this weed management program and of Lake Musconetcong.
